Beachside Rock & Traditional Log

Fuel bed options include our traditional log bed and the Beachside Rock firebed.

Brick Liner Options - There are three brick liner sets to choose from: Valor Red Brick, Ledgestone and Black Fluted Liner.

Standard with every brick set, base bricks cover the bottom of the engine (in front of the log grate) providing continuity within.

Legend G4 Insert with Log Set, Floating Bronze Trim and Black Fluted Liner

THE VALOR LEGEND G4

Introducing the Legend G4, our latest addition to the Valor insert family. Considered the "big brother" to our highly successful Legend G3 Insert, the G4 is a synthesis of distinct design and efficient, radiant heating performance.

At Valor, we believe the process of updating your living space esthetics should include a significant upgrade in fireplace technology and efficiency. The G4 pursues this concept with features including:

Valor Distinction - Contemporary steel trims create the perfect frame, showcasing spectacular flames within. Positioned inside the fireplace, engine controls are effectively "hidden" eliminating the need for space-consuming louvers. Both features are designed to further increase the overall viewing area and provide a seamless transition on surrounding wall surfaces.

Radiant Heat - Like heat from the sun, Valor fireplaces are designed to maximize radiant heat output. Travelling at the speed of light, radiant energy continuously warms objects in its path. When warming the human body, radiant heat satisfies your comfort needs with up to 25% less overall energy compared to forced air systems.

VDR (*Valor Dynamic Restrictor*) - Engineered to automatically adjust secondary combustion air within the fireplace, our brand new **"VDR Technology"** increases thermal efficiencies and radiant heat output - a Valor G4 exclusive. (*Patent Pending*)

No Power, No Problem - Valor Radiant Gas Fireplaces are fully functional heaters that don't require electricity (AC) for steady, efficient operation. Our fireplaces provide the perfect mixture of radiant and convective heat eliminating the need for a noisy, inefficient fan.

ValorStat Max Remote Control & Valor **SmartPilot System** (Standard w/ Purchase)

The **ValorStat Max** Remote Control gives you the power to select, adjust and program the desired temperature that you want. Timer and Thermostat mode help save energy and lower your home heating costs.

If the optional 795CFK fan kit is installed, the ValorStat Max provides full control turning the fan on and off, as well as adjusting the fan speed settings.

Electronic Pilot Ignition: The ValorStat Max also has the ability to turn your pilot light **ON** and **OFF** from the programmable handheld remote.

Safety Feature: The Valor SmartPilot System automatically shuts down if there is no activity after 5 days.

LEGEND G4 SERIES Please refer to the complete Legend G4 product manual before installation - valorfireplaces.com

G4 LINERS

VALOR RED

LEDGESTONE **BLACK FLUTED**

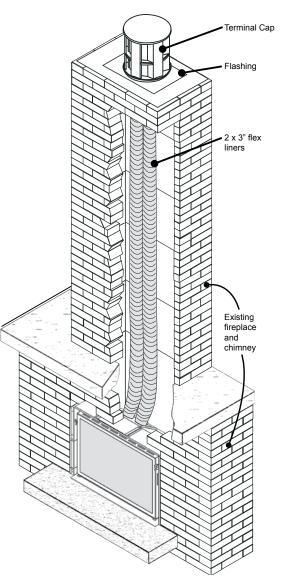

CONSUMER AWARENESS - Engineered to provide radiant heat for your home, fireplace surfaces (in particular the glass window) will get hot during operation. Objects should be kept a safe distance away from the fireplace at all times. Never allow children to touch the glass. Adult supervision is required. We recommend using safety screen if you have children in the home. For additional hearth safety information visit www.valorfireplaces.com/safety (&) www.hpba.org.

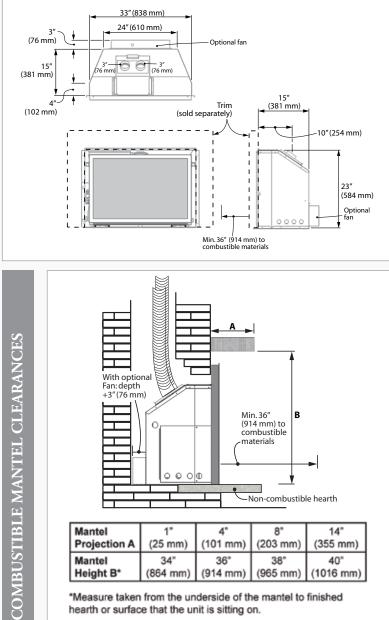

ABOUT OUR EFFICIENCY RATINGS - All Valor product literature is published using recognized Canadian and US government test methods for determining energy efficiency performance. This ensures our products will perform in your home as rated. Beware of misleading "steady state" efficiency claims made by manufacturers using their own "in-house" test methods. Examples include alterations to venting and installation restrictions which in turn produce false ratings.

Visit *www.valorfireplaces.com* for more information.

G4 DIRECT VENTING

G4 PRODUCT DIMENSIONS

*Measure taken from the underside of the mantel to finished hearth or surface that the unit is sitting on.

Model	Fuel	Max. Input BTU/hr	Min. Input BTU/hr	Log/Rock Set	Fan Option	EnerGuide P4 Rating**	AFUE**	Max. Output (w/out fan) BTU/hr **
780IN	NG	30,000	6,500	Log/Rock	Yes	67.3%	70.1%	21,882
780IP	LPG	28,000	14,500	Log/Rock	Yes	64.3%	67.1%	20,115

Please Note: The maximum vertical vent run for the Legend G4 is 40'. The minimum is 10'.
